## **COMMENCEMENT OF SEISMIC SURVEY**

Westralian Gas and Power Limited has received confirmation that seismic contractors will mobilise their crew to undertake the Warradarge Seismic Survey in DR 11 on Monday the 15th of August 2011.

The survey will be of approximately thirty kilometres in length and take up to forty days to complete allowing for weather.

This survey is designed to tie together several older generation of seismic surveys recorded to the east and the west of the permit. No significant seismic surveys of good quality have been recorded in the permit in the past.

The new survey is aimed at delineating the gas prone shales of the Carynginia Formation which are the target of the drilling to the northwest by a consortium which includes AWE Limited in EP 413. It is also anticipated that the Cattamarra Coal Measures and Cadda Formation which produced over 700,000 cubic feet per day gas in Ocean Hill # 1 (3 Km to the east) will also be mapped at a shallower depth along with enhancing the understanding of the faults within the Company's Permit.

This work will determine the locations of the two wells planned for late 2011 early 2012, subject to DMP approvals.

Stephen Thomas  
Managing Director
