TITAN ENERGY SPUDS WARRADARGE-1 EXPLORATION WELL IN NORTH PERTH BASIN

HIGHLIGHTS:

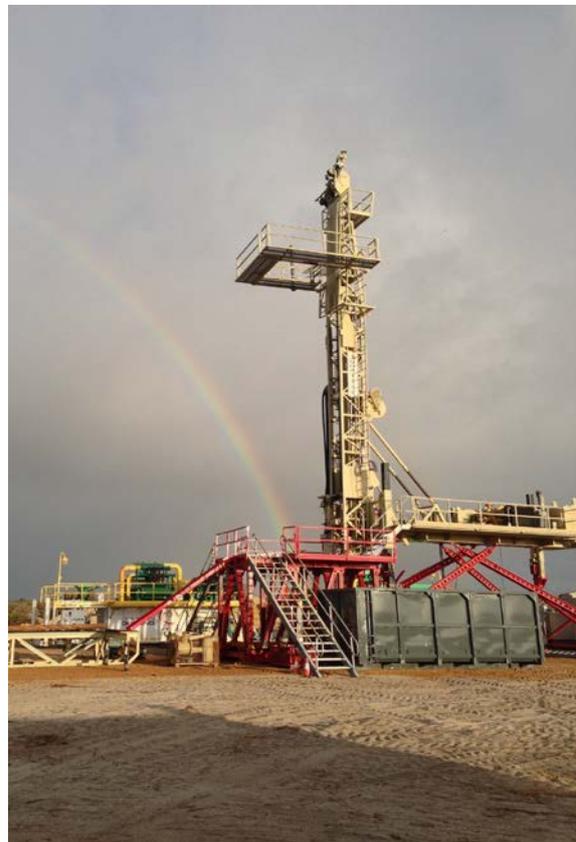

- First well in DR11 permit
- Well targeting proven Cadda Formation and Cattamarra Coal measures
- Well located in high profile area of a hydrocarbon producing basin
- Work continuing on obtaining drilling approvals for Warradarge-2 well

Australian oil and gas company **Titan Energy Ltd** (ASX: TTE) (Titan Energy or the Company) is pleased to report that the Warradarge-1 exploration well spudded at 9.00 am WST in its 100% owned DR11 licence, onshore North Perth Basin, Western Australia.

Being drilled by Dominion Drilling Pty Ltd's UDR 1500 HD rig, the Warradarge-1 well is planned to be drilled to a Total Depth (TD) of approximately 1,500 metres (4,500 feet) and is expected to take approximately 12 days to reach TD.

The well is targeting the proven Cadda Formation and Cattamarra Coal measures of the Jurassic sediments within DR11. Titan Energy aims to collect formation cutting samples and utilise modern downhole data acquisition tools during the drilling programme to assist in fully assessing the conventional and unconventional hydrocarbon potential within this section of DR11.

"The start-up of drilling at our first oil and gas well in DR11 is another significant milestone for our Company," Titan Energy's Chairman, Darren Levy, said.

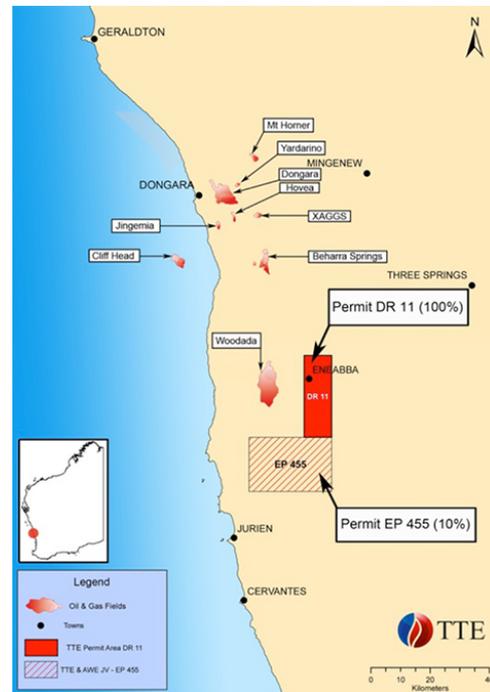

“This area of the North Perth Basin has received a good deal of focus recently due to nearby drilling successes and we look forward to this well testing an area we believe may be a ‘sweet spot’ in this part of the basin.”

The well site for Warradarge-1 was selected following processing of 2D seismic data acquired by Titan Energy in its successful Warradarge 2D Seismic Survey acquired in late 2011 over the DR11 permit.

DR11 is located approximately 280 km north of Perth, lies 10 km to the west of the Woodada gas field and 20 km north-west of the recent Arrowsmith gas discovery by Norwest Energy NL and AWE Limited.

Titan Energy is also seeking approval for the drilling of the Warradarge-2 exploration well after the authorities elected to separately consider environmental approvals for Warradarge-1 and Warradarge-2.

Warradarge-2 is currently planned to be located 4,100 metres to the north east of Warradarge-1 under a matching drilling plan. The Company will update the market further on approvals for Warradarge-2 as they get closer to conclusion.

ABOUT TITAN ENERGY

Western Australian-based Titan Energy Ltd (ASX: TTE) is a global oil and gas explorer with growing interests in Australia and the United States.

Titan Energy is part of a global industry that has an important role to play in improving the living standards of current and future generations through meeting the global demand for petroleum in a socially responsible manner.

The Company is actively searching for oil and gas in the highly prospective onshore Perth Basin in Western Australia and in proven international hydrocarbon producing areas.

Titan Energy’s Warradarge Seismic Survey in North Perth Basin permit DR11 has been used to define the location of the two wells currently being drilled by the Company.

The Company is also participating in a Joint Venture with AWE Limited which has farmed in for an 81.5% equity share in an area known as Eneabba South (EP455) in the North Perth Basin.

The Company has also built up a significant onshore presence in the USA with completed agreements to:

- Acquire an 87.5% Working Interest (WI) in 344 gross acres on the southern side of the Allen Dome Salt Dome in Brazoria County, Texas;

- Acquire an approximate 94% WI in 276 acres of productive acreage on the Northern flank of the Allen Dome;
- Farm-in for an 80% Working Interest (WI) in the 1360 acre Sodbuster Prospect in Logan County, Colorado;
- Acquire a 50% interest in the “ready-to-drill” approximately 129 acre Greathouse Prospect, plus an option over an additional 123 acres, within the South Lake Charles oil and gas field in Louisiana;
- Acquire 441 acres in the Kinmundy Prospect area in the Illinois Basin; and
- Acquire approximately 17,000 acres of prospective shale properties in the US state of Nevada.

The Company continues to review additional projects that satisfy the Company’s strategic objectives.

Competent Person’s Statement:

Information in this report that relates to Hydrocarbon Reserves and or Resources is based on information compiled by Mr Stephen Thomas, Director of Titan Energy Ltd who has consented to the inclusion of that information in the form and context in which it appears.

Mr Thomas has over 30 years’ experience in petroleum geology and in oil and gas exploration and production, both in Australia and internationally, as either an employee or consultant to oil companies operating in the upstream petroleum industry. Mr Thomas reviews the Company’s operations with the help of various professional consultants, appropriately qualified and experienced in their respective fields within the upstream petroleum industry. He is also a member of AusIMM, a fellow of the Royal Geological Society of London and has a BSc (Hons) in geology from the University of South Wales.
